MASTIC ASPHALT FLOORING
UNDERFLOOR HEATING

A poplar question to The Mastic Asphalt Council Technical Help Line, is, can you install Mastic Asphalt Flooring over a surface with underfloor heating, if so where do you place the heating elements within the build up of the system?

MAC's recommendation will always be that the elements must be placed within a screed firstly to protect the elements from the heat of the asphalt and secondly to provide a suitably level substrate for the Mastic Asphalt Flooring to be installed onto.

Additionally, the temperature at which the asphalt will be expected to perform is key, so a project by project assessment would need to be made based on the maximum in-service temperature and anticipated loadings, to this end MAC's recommendation is to contact our Manufacturing Members Technical Departments who will gladly assist in these matters and provide a suitable specification for the grade and thickness of the Mastic Asphalt Flooring installation.

The Manufacturing Members details are as follows;

GUARANTEED ASPHALT LTD
14 Princewood Road
Earlstree Industrial Estate
CORBY
NN17 4AP
Tel: 0207 277 8773
info@guaranteedasphalt.com
www.guaranteedasphalt.com

IKO PLC
Prospect Quarry
Grangemill
MATLOCK
DE4 4BW
Tel:01257 256888
GMTechnical@iko.com
www.ikogroup.co.uk
