

TRAFFIC CALMING MEASURES

Traffic advisory leaflet 7/96 “Highway (road humps) Regulations 1996” refers, (these are applicable to roads which have a speed limit of 30mph or less). Local authorities are required to ensure that their designs do not compromise safety. Design engineers are recommended they receive the appropriate traffic advisory leaflet from DETR.

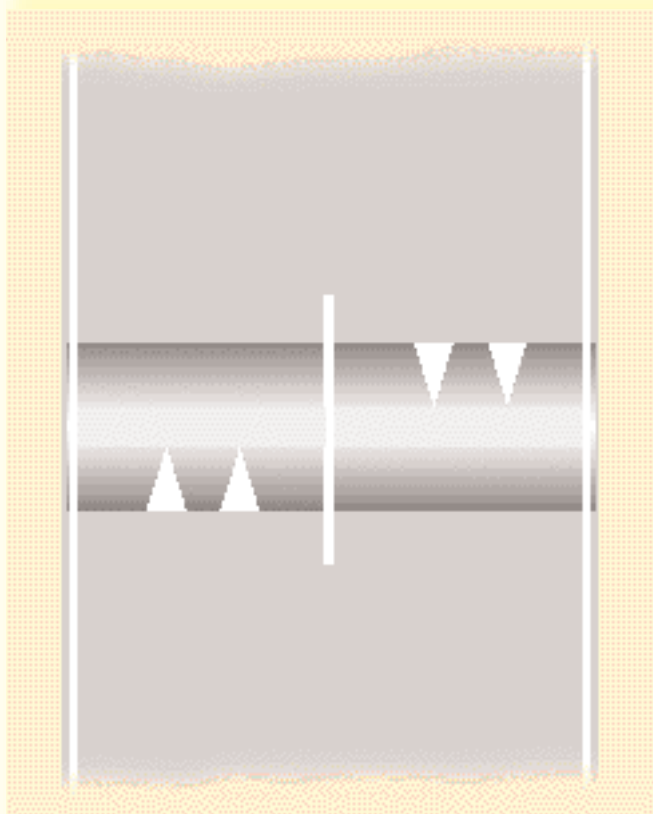

Product specification

Mastic asphalt to BS1447:1988 Type B Grade S with 6mm aggregate in black or red is recommended for the individual calming devices detailed. As mastic asphalt is always laid by hand by qualified spreaders, it is the most suitable bituminous material available for the three traffic measures identified.

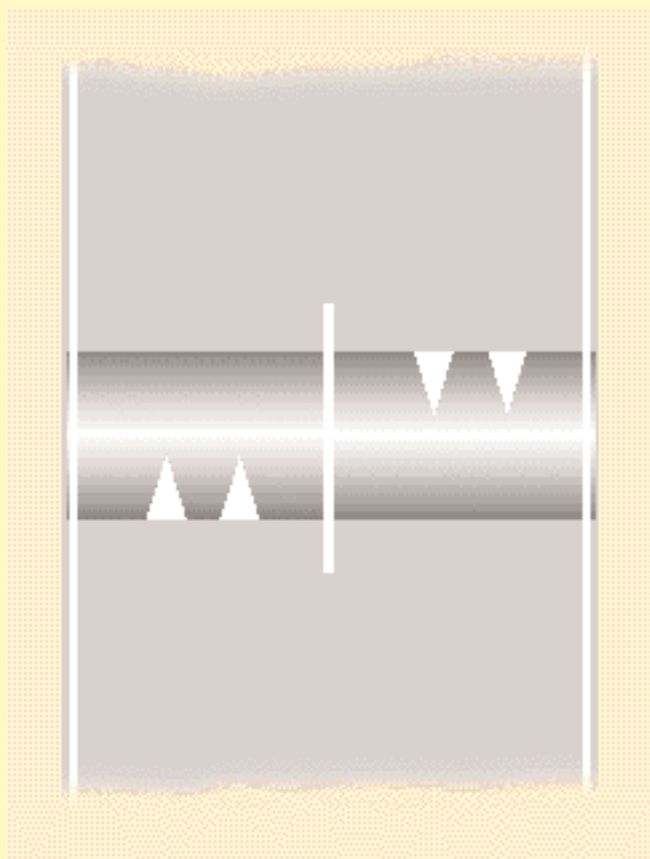

- A) 75mm high road humps
- B) Speed cushions
- C) Rumble devices

PAVING Pt 2

A) Traffic advisory leaflet 2/96 75mm high road humps
