

Miscellaneous specifications

RAILWAY PLATFORMS & FOOTBRIDGES

The ultimate, long life maintenance free surfacing, which provides designers with a safe, smooth, trouble free surface, suitable for both pedestrians and vehicular traffic.

SPECIFICATIONS

30-40mm BS1447:1998 Type B Grade S or H with 30-40% 6/10mm aggregate laid in one coat with a sand rubbed finish. In foot trafficked areas where improved slip resistance is required, the mastic asphalt should be given a crimped surface finish.

Various colours are available for the colour coding and/or delineation of foot traffic priority areas.

Assistance with the design of mastic asphalt surfacings is freely available from your supplier or from the technical department of the Mastic Asphalt Council.

PAVING Pt 2
