<u>Introduction</u>	Page 3
<u>Design considerations</u>	Page 3
General	Page 3
Tanking principles	Page 3
Tanking details	Page 4
Methods of tanking	Page 4
Selection parameters	Page 4
External tanking	Page 5
Internal tanking	Page 5
Loading slabs & walls, protective walls and screed	Page 6
Tank linings for liquid containing structures	Page 6
Pumping	Page 6
Backfilling	Page 6
<u>Design of the base</u>	Page 6
General	Page 6
Substrates:	Page 7
Concrete	Page 7
Structural walls	Page 7
Keying to vertical & sloping surfaces	Page 7
<u>Mastic asphalt tanking</u>	Page 7
General	Page 7
Horizontal, sloping and vertical surfaces	Page 7
<u>Surface protection</u>	Page 8
General	Page 8
<u>Detail considerations</u>	Page 8
Movement joints	Page 8
Construction joints	Page 8
Service pipes	Page 8
Pile caps	Page 8
Separating membranes	Page 8
Keying to vertical and sloping concrete surfaces	Page 9
Keying to brickwork surfaces	Page 9
Filletts	Page 9
Chases	Page 9

TANKING

tanking

Special conditions

Page 9

Boiler houses, sumps and fuel storage areas	Page 9
Storage tank linings for aggressive liquids	Page 9
Tank room floors	Page 10
Ventilated boiler houses	Page 10
Hot water pipes	Page 10
Manholes	Page 10
Discharge of hot liquids	Page 10

Site work

Page 10

Work planning	Page 10
Preparatory site work prior to asphaltting	Page 11
Achieving required quality of work	Page 11
Documentation and preparation	Page 11
Receiving and checking materials	Page 11
External tanking excavation	Page 12
Internal tanking excavation	Page 12

Workmanship

Page 12

Remelting	Page 12
Transport of molten material	Page 12
Laying the mastic asphalt tanking	Page 12
Horizontal work	Page 12
Junctions	Page 13
Verticals	Page 13
Angle fillets	Page 13
External angles	Page 13

Typical specifications

Page 14

1) Externally applied mastic asphalt tanking to concrete	Page 14
2) Externally applied mastic asphalt tanking: detail of 'pick-up'	Page 14
3) Externally applied mastic asphalt tanking under foundations	Page 15
4) Externally applied mastic asphalt tanking over pile caps or under column bases	Page 15
5) Sump or inspection chamber in externally applied mastic asphalt tanked basement	Page 16
6) Internally applied mastic asphalt tanking	Page 16
7) Service pipe passing through mastic asphalt tanking or tank lining	Page 17
8) Mastic asphalt lining to cold water storage tank	Page 17
9) Mastic asphalt lining to catch pit, sump or other structure receiving the discharge of hot liquids	Page 18

TANKING

tanking
